

SVM All Europe SRI Fund Short Report

Period to 30 June 2007

Key Objectives

The investment objective of this Fund is to achieve above average capital growth over the medium to long-term (although short-term investment opportunities will also be considered) and it aims to outperform the FTSE World Europe Index. The Fund will adopt a positive engagement approach towards investment and enter into meaningful and consistent dialogue with companies to ensure investors in the Fund have their assets working effectively.

Risk Profile

The Fund is exposed to market and currency risks as it invests in European companies. It also invests in companies outside the FTSE 100 Index which can be less liquid and may carry greater risk and volatility. The Fund is exposed to Sterling and a variety of European currencies as well as stockmarket fluctuations. The fund does not actively hedge the currency risk of the portfolio.

The first half of 2007 was characterised by strong European markets as investors reacted positively to the improving European economy. There was however considerable divergence at country level with the higher beta markets of Scandinavia and Germany significantly outperforming others such as the UK and Italy. The Fund substantially outperformed the index over the period. It was especially pleasing to see that the Fund's performance was driven entirely by stock selection and not asset allocation as we are overweight in an under performing UK market.

The biggest contributor to performance was the German industrial, Klöeckner, which saw ongoing earnings upgrades. UK consumer electronic company, Pace Micro Technology, was another positive performer. The company is benefiting from strong demand for its products and improved operational performance. Other notable performers included: Semapa, a Portuguese investment company; Fiat, the Italian automaker; and MTU Aero Engines, the German aerospace company. The Fund endured disappointing performances from British Airways, Barratt Development and Seabird Exploration. With the exception of the latter we remain committed holders and have added to our positions.

Despite four years of strong gains we believe that the outlook for equities remains positive with valuations reasonable and global growth robust.
